

**NEW HIGH-CAPACITY PrecisionFCI™ SOLID METAL HOSE-END
NOZZLES NOW AVAILABLE FROM UNDERHILL**

ALISO VIEJO, CA

Underhill introduces PrecisionFCI™ solid metal hose-end nozzles, a series of irrigation products designed for site-specific solutions, including syringing and cooling baseball infields and sports tracks, applying wetting agents, and hand-watering dry spots and landscaped areas.

The patented PrecisionFCI™ nozzle design features stainless steel professional-grade diffuser plates with rubber covers. Precision spray patterns ensure optimum flow rates and uniform droplets.

The PrecisionFCI™ nozzles are available in a range of sizes and applications, depending on specific needs. Models feature 15 to 50+ gpm and include:

The **Rainbow** (15 gpm at 80 psi), useful for watering transplants and seed beds in landscaped areas.

The **Rainmaker** (23 gpm at 80 psi), recommended for syringing, cooling and hand-watering turf and landscape with a garden hose at lower pressures.

Fogs at high pressure.

The **Cloudburst** (48 gpm at 80 psi), used for the application of wetting agents, syringing and washdown.

The **Cyclone** (50+ gpm at 80 psi), covers a large turf area up to 60' with syringing and cooling.

Solid brass control valves are also available with $\frac{3}{4}$ " and 1" hose thread adapters.

For more information on PrecisionFCI™ hose-end nozzles and other Underhill irrigation products, visit the Underhill Web site at www.underhill.us or call toll free: 866-863-3744.

Underhill is headquartered in Aliso Viejo, CA, and has been supplying the sports field industry with irrigation products for more than 25 years.
