

**INTRODUCING SUPERKEY: MULTI-FUNCTION
GOLF TOOL FOR ROTOR MAINTENANCE**

LAKE FOREST, CA

SuperKey, a handy new gadget from Underhill International, facilitates golf course rotor maintenance by combining the functions of multiple tools into one device.

SuperKey measures approximately 12 inches tall and is offered in two models: SKRB for Rain Bird rotors and SKT for Toro rotors.

Depending on the model, SuperKey features a range of functions, including:

- 1) manual on/off sprinkler control;
- 2) on/off control assembly removal;
- 3) a prong to remove debris from the rotor's on/off control;
- 4) tools for both bottom valve snap ring removal and
- 5) rotor assembly snap ring removal;
- 6) solenoid plunger removal; and
- 7) pilot valve removal.

The device also has an on/off control pointer.

SuperKey is constructed from aircraft-grade stainless steel and high-strength composite for long-lasting durability.

For more information on SuperKey, visit the Underhill website at www.underhill.us or call 866.863.3744.

Underhill offers an expanding line of turf care products for golf courses, including FCI Profile™ solid metal nozzles for efficient water distribution; LiquidPro™ wetting agent applicator; Magnum™ and Precision™ hose end nozzles; and Tracker™ portable irrigation.

The company is headquartered in Lake Forest, CA, and has been in business for more than 25 years.
