

UNDERHILL GULP™ PUMPS USEFUL FOR QUICK WATER REMOVAL ON PARKS, SPORTS FIELDS

LAKE FOREST, CA

Gulp, a new series of de-watering hand pumps, is now available from Underhill International for use on parks, sports fields and other landscaped sites. The pumps are designed for quick and efficient water removal from sprinkler and valve boxes or other areas where puddling has occurred. Constructed from heavy-duty, corrosion-resistant materials, Gulp pumps are self-priming and easy to clean.

Four models are available:

Super Gulp has an 84" inlet and 36" outlet hose and can remove up to 16 gallons of water in one minute; Big Gulp has a 36" inlet and 72" outlet hose and removes a gallon of water in only four strokes; Gulp has a 10" inlet and 12" outlet hose; and the mini Gulp Syringe has a 11" inlet for water removal in tight spaces.

For more information, contact Underhill International at 866.863.3744 or visit the website at www.underhill.us.

Underhill offers an expanding line of irrigation products for sports fields, including 2Wire Decoder systems, Pellet Pro wetting agent applicators, MicroEase low volume kits, Magnum and Precision hose-end nozzles, and FCI Profile stainless steel hose-end nozzles.

The company is headquartered in Lake Forest, CA, and has been in business for 30 years.
