

NEW GULP™ WATER SUCTION PUMPS
NOW AVAILABLE FROM UNDERHILL

Gulp™ and BigGulp™, two versatile hand pumps that remove water from valve boxes, sprinklers and other wet spots on golf courses and sports fields, are now available from Underhill.

Gulp measures 12" long and has a 6" quick-clean discharge tube.

BigGulp, which can pump out one gallon per stroke, is a heavy-duty self-priming version that is 36" long with a 72" discharge tube. In just four quick strokes, BigGulp typically eliminates water from valve boxes, sprinklers or other flooded areas.

Both Gulps are constructed from durable corrosion-proof materials and can be carried on maintenance carts for faster clean-ups.

For more information about Underhill Gulp and BigGulp pumps, call Underhill toll free at 866-863-3744 or see the products online at www.underhill.us.

Underhill offers a growing line of irrigation products for golf courses and sports fields, including 2Wire Decoder systems, Pellet Pro wetting agent applicators, Magnum and Precision hose-end nozzles, traveling Tracker portable irrigation and FCI Profile stainless steel golf nozzles.

Underhill also features the M-160, a 160-foot-radius pop-up sprinkler designed for natural and synthetic turf.

Underhill is headquartered in Aliso Viejo, CA, and has been in business for more than 25 years.
