If on Skin or Clothing: Take off contaminated clothing and wash before reuse. Rinse skin immediately with plenty of soap and water for 15 to 20 minutes.

General Information

•TOURNAMENT-READY contains a blend of natural renewable resource surfactant components combined with traditional surface-active agents that deliver long lasting residual performance. This unique class of surfactant blend works to prevent and control localized dry spots.

•TOURNAMENT-READY is the only surfactant that combines ingredients known to deliver long-lasting residual performance with natural, environmentally balanced components.

Research has proven that organic coatings surrounding sandy particles inhibit the infiltration of soil moisture. In high heat stress periods, delicate turfgrass can sustain injury or total loss due to lack of available moisture.

•TOURNAMENT-READY won't harm beneficial soil microbes and has been developed with respect for the environment and worker safety.

•TOURNAMENT-READY works wherever localized dry spot occurs: golf greens and tees, fairways, athletic fields, and residential or commercial lawns.

•TOURNAMENT-READY reduces the surface and adhesive tensions of water.

•TOURNAMENT-READY assists water's infiltration and drainage of compacted or hydrophobic soils. It assists in the wetting of heavy thatch and when used regularly, will eliminate localized dry spots.

Storage and Disposal

Storage: Keep container tightly closed. Store in original container only. Store in a well-ventilated space. Keep cool.

Disposal: Triple rinse container, empty rinse water into spray or stock tank. Dispose of contents/container in accordance with local/national regulations.

Directions For Use

Golf Course Greens and Tees: As a preventative treatment, apply TOURNAMENT-READY at a rate of 8 fluid ounces (240 ml) diluted in 1 to 3 gallons (4 to 12 litres) of water per 1,000 square feet (100 square metres) in advance of high heat stress. After 7 to 14 days following initial application, apply an additional application of 8 fluid ounces (240 ml) per 1,000 square feet (100 square metres) diluted in the same manner.

A monthly maintenance treatment schedule can be substituted for the preventative treatment rate as follows: Using dilution rates as indicated above; apply an initial application of 8 fluid ounces (240 ml) per 1,000 square feet (100 square metres) followed by monthly applications at a rate of 4 fluid ounces (120 ml) per 1,000 square feet (100 square metres).

Follow tank mix applications with a brief watering-in of treated turf areas to ensure that TOURNAMENT-READY moves to the soil profile.

Golf Course Fairways, Athletic Fields and General Turf Areas: Apply TOURNAMENT-READY at a rate of 16 to 24 fluid ounces (480 ml to 720 ml) diluted in 40 to 50 gallons (150 to 190 litres) of water per acre (0.5 hectare). Reapply monthly throughout the season.

Irrigation Injection: Monthly Program: Inject 16 to 24 fluid ounces (480 ml to 720 ml) in 40 to 50 gallons (150 to 190 litres) of water per acre (0.5 hectare) per month throughout the growing season.

Soil Mixes and Lawn Care: Apply 4 fluid ounces (120 ml) of TOURNAMENT-READY diluted in 5 gallons (20 litres) of water, then apply to 1 cubic yard (0.75 cubic metres) of soil mixture or each 1,000 square feet (100 square metres) of planting area.

Lawn Care: Apply 2 to 4 fluid ounces (60 ml to 120 ml) diluted in 2 to 3 gallons (8 to 12 litres) of water applied per 1,000 square feet (100 square metres) Irrigate immediately following application.

Tank Mixing

Tank mix combinations containing TOURNAMENT-READY have not been tested under all growing conditions. Applicator should follow instructions of pesticide label to determine such use. Always exercise caution when using wetting agents with other commonly used turf chemicals and fertilizers. Test a limited turf area prior to large scale applications.
